ARLINGTON, VA – Blackbox Partners, LLC won a subcontract on the NG-CCAS program, providing data architecture and database design consulting services to Northrop Grumman Corporation. The NG-CCAS is a proof-of-concept SOA Java-based application built over Oracle, meant to show state-of-the-art functionality to the Department of Defense in preparation for eventual replacement of the SPOT personnel tracking system.

Blackbox Partners continues its long record of providing quality database consulting services in the federal government space.
